Summary

B.Tech Information Technology student with hands-on experience building full-stack web and AI-powered applications using React, Node.js, MongoDB, REST APIs, Python and Google Gemini API.

Education

B.Tech in Information Technology	2023 – 2027
Babu Banarasi Das Institute of Technology and Management	CGPA: 7.0
Intermediate (ISC)	2023
City Montessori School	88.50%
High School (ICSE)	2021
City Montessori School	91.02%

Technical Skills

Languages	Python, Java, JavaScript, C
Web Development	React.js, Node.js, HTML, CSS, Tailwind CSS
Database	MongoDB
AI	Google Gemini API
Tools	Git, GitHub, Vite, VS Code, Vercel
Core Concepts	OOP, REST APIs

Projects

PrepMate – AI-Powered Interview Preparation Platform [Live Demo](#)

- Built and deployed an AI-powered interview preparation platform that analyzes resumes and job descriptions to generate personalized interview questions, ATS match scores, skill-gap analysis and AI-generated learning roadmaps.
- Integrated Google Gemini AI with React/Vite, Node.js, Express.js and MongoDB Atlas, implementing REST APIs, JWT authentication and PDF resume processing.

BagPack – AI-Powered Travel Planning & Destination Intelligence System Final Year Project

- Designing a personalized travel planning system for destination discovery, itinerary generation, budget planning and travel recommendations using AI-driven travel intelligence.
- Planned a React/Vite + FastAPI + PostgreSQL architecture integrating Google Gemini, Google Places and Google Routes APIs for personalized itineraries and route-aware travel planning.

Chronic Kidney Disease Prediction System [Live Demo](#)

- Contributed to a team-based CKD prediction system by organizing and preparing the UCI clinical dataset and supporting the frontend implementation.
- Assisted in testing the end-to-end prediction workflow, integrating the web interface with the FastAPI backend and machine learning pipeline.

IRON CORE – Fitness Workout Platform [Live Demo](#)

- Built a responsive fitness application featuring exercise search, workout recommendations and BMI/calorie tracking using REST APIs.
- Developed the frontend using React.js, Tailwind CSS, JavaScript and Vite with real-time API integration.

Certifications

- Project-Based Summer Training in Full Stack Development – GRAShTech, 2026
- Accenture Developer & Technology Job Simulation – Forage, 2025
- AI & Cybersecurity Awareness – TCS iON, 2026
